广交会出口产品设计奖
CANTON FAIR DESIGN AWARDS

前言 Foreword

自2013年以来，这是广交会上第五份中国外贸工业设计精品集。

作为全球最大的国际贸易盛会，广交会汇聚着中国最优秀的出口制造商，为全球市场提供兼具卓越创意和品质的产品。

正因如此，旨在甄选兼具设计价值与市场价值精品的广交会出口产品设计奖（CF奖），才能每年一度成为中外商贸界关注的焦点。

2017年，CF奖共有574家企业的1086件产品参评，企业及产品数量均创历史新高，涌现出更多创意独特、构思巧妙、富有商业前景的设计精品，显示奖项的影响力持续获得稳步提升。

历时317天，40名境内外专家从上述产品中层层甄选，历经在线检视、现场体验、集中评议等方式，最终确定57家企业的72件产品获得殊荣。

这些产品，将是采购和零售领域争相追逐的新热点，也是本年度广交会上最先进设计力量的代表，体现了广交会荟萃精品、引领创新的平台力量。

愿您与CF奖继续同行，在广交会上创造美好未来。

From 2013, this is the fifth top collection of industrial design of China's export products.

As the world's largest international exhibition and trade event, the Canton Fair has been gathering the best exporting manufactures in China, providing excellent products with extraordinary originality and quality for the global markets.

Because of this, the Canton Fair Design Awards (CF Awards for short) is aiming at selecting the excellent products that are well-designed and go well on market, and has become the focus of global trade community every year.

This year, there're 1086 products from 574 enterprises participating in, making a new record in terms of the numbers of companies and products. More unique, ingenious, and commercially promising design products have sprang up, which indicates that the influence of CF Awards has steadily risen.

The event goes through 317 days. 40 professional domestic and overseas jurors dedicated to make the evaluation more impartial and objective by executing the procedures precisely, such as online testing, firsthand experiencing and group reviewing. And finally 72 products of 57 enterprises were identified to win the awards.

These products will be new hotspots of sourcing & retailing fields. Also, they are outstanding representatives of the 2017 best design products at the Canton Fair, demonstrating the platform advantage of Canton Fair in collecting excellent products and leading industrial innovation.

We sincerely wish CF Awards will always be with you, and help you to create a brilliant future at Canton Fair.

评委评价 Comments of Jury

何人可 Renke He :

无论是外观设计还是功能设计，无一不体现着对于设计的深入理解和完美展现，是绝佳的产品设计。

Whether its appearance or function design, the product reflects the deep understanding and perfect display of industrial design.

It's perfect.

Safi Hefetz :

The product is a breakthrough of technology and design. You can't imagine how smooth when riding it, you should have a try!

这个产品在技术和设计上都有突破，你完全无法想象骑上去有多舒畅，你应该试试！

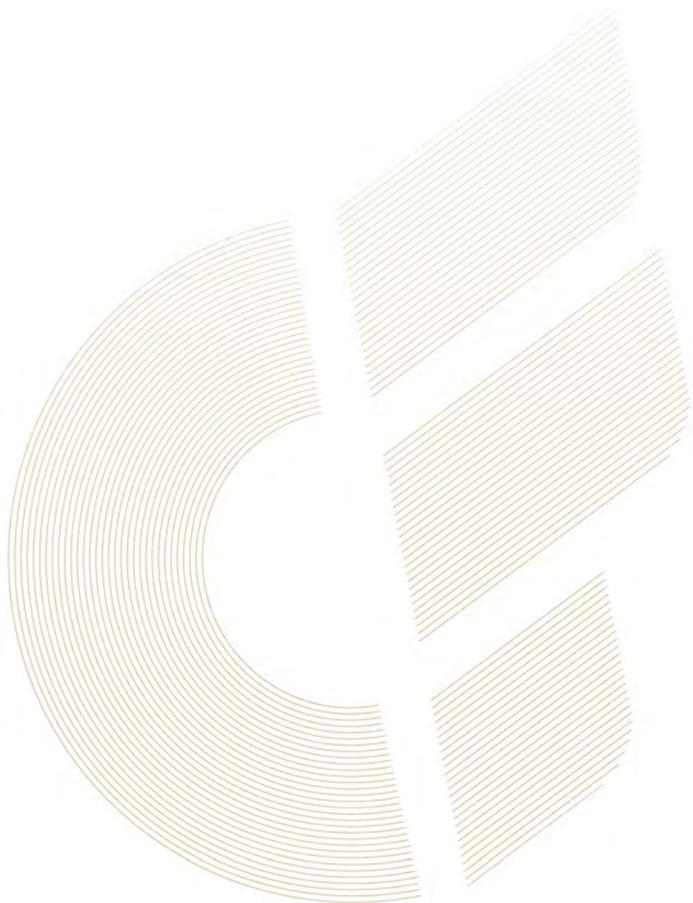

本产品特点：

- 1、为市场上首款独家研发的电动公路车，具有专利技术的管藏下拉式隐形电池，美观大方；仅重16.9KG，跟同尺寸的碳纤维电动车比毫不逊色；市场上电动车几乎在23KG左右；
- 2、采用电动助力模式，可以瞬间提速，使骑行者快速达到45KM/H 的速度，享受到只有专业车手才会体会到的速度与快感。
- 3、与以色列分公司开发的一款APP，具备GPS定位、防盗、运动热量、行驶里程、健康指数等功能；智能化后台数据管理系统；随时可以掌控消费者使用的各种异常情况，可智能化通知消费者到最近的维修点维修或者维护（正在完善中）此项技术行业独创。

1. Pluto R has technical patent of invisible and drop down battery, production position: light, concise, light luxurious. Its weight is only 16.9kg, and the common electric bike is around 23kg;
2. Use invisible one cable design, no useless cables (normal electric bike has more than 10pcs cables, while pluto R only have 3pcs)
3. Developed by Israel branch, have GPS, antitheft, monitoring of calorie, mileage, health index, and other functions. APP background data management system, Intelligent control the abnormal situation in use, it can notify the consumers to go to the nearest maintenance depot (under development) , this is the original and unique technology in this business area.

本产品特点:

目前电视业界的产品,边框与后壳之间结合的工艺无非是螺丝、卡扣、粘接等方式。P6产品最大的创新亮点是主体外壳采用无缝金属一体成型的独家技术及生产工艺,将前后壳合二为一。这种一体成型的包裹方式除了让外壳无螺丝、无拼缝外,还让边框更薄、更窄。

P6超窄边框仅为4.8MM,主体厚度仅为9.8MM。采用侧入式背光。左上角边框嵌以真皮“popular”装饰角标作为点缀,多种材质的创新组合使产品外观更加年轻时尚。

为了传达极简和精致,整机只有一个圆形金属按键。并且我们用更多精致的工艺来制作。在待机状态时,金属CD纹批次质感区域会透出灯光符号。而当电视开启时,灯光符号会消失,更加具有科技感。也可以通过远场语音控制件,直接对电视说话,实现智能操控,代替语音遥控器和麦克风。

P6 brings innovative solution to make frame and back cover in one single part. The connection between the frame and the back cover is realized through gluing or structural ribs, making the overall appearance smoother. This technology makes the product be stronger and lighter without gaps between parts. The optimization allows the product to be even 50% slimmer than previous model. On the aluminum bottom frame we place a refined diamond cut, together with a smooth arc providing a friendly and Hi-tech touch.

"Popular" is a younger and fashionable product line. To achieve that the real leather label together with an ultra-slim frame of 4.8MM is used and main body thickness is 9.8MM.

The front bottom has a functional and decorative visible element that is detailed manufacturing in metal with CD pattern. This bottom has not just the simple switch function, it also has the advantage of it is that the user with a double click can easily jump to the previous content. Other specs are the voice control direct to the TV as complementary solution to the remote control.

评委评价 Comments of Jury

Safi Hefetz :

It's a slim design and it has accurate details. The remote control is user-friendly. The users will have good using experience.

这是一个轻薄的、有着精巧细节的产品,从他的遥控器就可以看出,产品的用户体验非常棒。

本产品特点:

组合机器人是以家庭服务为理念而研发, 满足用户多样化需求的智能家居机器人。

该机器人由地面清洁、智能管家、空气净化、空气加湿四个模块组成。为了满足用户的多样化需求, 可将智能管家模块与地面清洁模块组合使用, 用户通过APP实现远程家电控制、视频监控、智能安防、任务预约等。

空气净化模块和空气加湿模块分别与地面清洁模块组合使用, 实行全屋巡航深度净化、加湿, 扩大适用范围; 同时各模块均可单独使用, 让用户“一举多得”, 完美的体验感充分体现了“智生活, 享人生”的品牌理念。

The UNIBOT is a robot developed according to the household services concept to meet the diverse demands of the users. This robot is composed of four modules: floor cleaning, smart housekeeping, air purification, and air humidification. To meet the diverse demands of the users, the smart housekeeping module can be used in combination with the floor cleaning module; and users can achieve remote household appliance control, video monitoring, smart security, and task appointment via the APP.

The air purification module and the air humidification module may be used in combination with the floor cleaning module to cruise through the entire house for in-depth air purification or humidification, and thus expanding the scope of application. Each module may also be used independently so that users may achieve multiple tasks at once. The users' perfect experiences will fully demonstrate the brand concept of "Live Smart. Enjoy Life."

评委评价 Comments of Jury

何人可 Renke He:

这是一款复合型家电, 能够大大节省室内所占的空间, 并满足大多数的功能性要求, 为用户提供整体解决方案。

This is a composite home appliances, can greatly save the occupied space, and meet most of the functional requirements, to provide users with an overall solution.

本产品特点:

全新的设计理念, 极简的外观及结构设计, 模块化、系列化的开发思路, 仅仅通过跟换水箱和前壳两个零件的不同高度以极少的成本完成系列化的派生, 表面粗细合适的蚀纹处理方案, 有效地解决了使用操作中消费者容易留下手印、水渍等现象, 行业首创湿帘打开即机身完全断电的创新安全理念, 时刻为消费者安全保驾护航。

造型上创新性的将导风板和整体造型通过环绕凹槽的方式有效地结合了起来, 打破了市场上同类产品导风板只有功能突兀、孤立的形象, 增强了产品视觉冲击力, 贴心的外挂香薰盒设计, 在不破坏整体造型的前提下, 使产品看上去更加丰富。

功能上创新性的使用了一体化水箱, 外部手动加水和自动加水两种模式, 有效地解决了市场上主流冷风扇每次加水、加冰晶都需要拆开湿帘、滤网的麻烦, 在增加用户体验的同时减少了用户触电的心理。

The product uses a new design concept, minimal appearance and structural design, modular and serialized development ideas. Through changing the height of the two parts with the tank and the front shell at a very low cost, the product completes the series derivation. The appropriate thickness design of the surface effectively solves the problem of leaving fingerprints and water stains on the surface during the operation. The concept of complete power-off during opening is the industry's innovation.

The wind guide plate is combined with the overall shape through the annular groove innovatively which breaks down the fixed image of similar products that only has function of the unexpected, isolated image, and enhances the visual impact of the product, intimates outside the fragrance box design, without destroying the overall shape of the premise, so that the product looks more abundant.

**本产品特点:**

本产品是一款有显著特点的大尺寸户外蓝牙音箱,其特别之处是将6级防水功能(IPX6)和DJ灯光效果、照明功能设计于一体。本产品预置了多种灯光模式:随音乐脉动的灯光模式、呼吸灯模式、手动调节灯光色彩模式和照明模式。

本产品巧妙地将LED光源设置在半透明音箱腔体中,以实现高等级防水功能和DJ灯光效果。这一做法,克服了现有市场产品中,带氛围灯的音箱无法做到高等级防水的难题。

外观设计方面,采用简洁硬朗的线条来诠释其户外特质。产品两端将汽车的轮圈元素置入其中,有效增强了产品的视觉冲击。

As a specially designed large size outdoor Bluetooth speaker, this product has outstanding features: it combines IPX6 water-proof function, DJ light effect and lighting function together. Its LED light has some preset modes: pulse to the music, breathing light, manual light setting, and lighting mode.

The product uniquely puts the LED light source in translucent speaker cavity, in order to achieve high standard water-proof and DJ light effect. In this way, it overcomes the challenge that the current products in the market are facing: speakers with pulse light cannot have high standard water-proof effect.

About design concept, the designer use simple but rough outline to define the outdoor feature. On both sides of the product, the designer use automobile wheel rims element to enhance the visual impact.

**本产品特点:**

67°C蛋机是国内第一款真正意义上的低温料理“煮”蛋器(67°C源于烹煮温泉蛋的精准温度值),极简人机交互实现一键轻松烹煮Q弹全熟蛋、流沙溏心蛋、乳酪温泉蛋和镜面蛋羹,烹煮过程中伴随声音灯光进度提醒,提供最佳用户体验。

产品整体采用仿生学设计,造型灵感源于萌趣小鸡形象。树丫型防烫鸟巢蛋架和蒸煮合一多功能蛋架单手即可提出,食用级PP材质,通过FDA权威认证,无毒无味不变形,与主体相映成趣。

食品级304不锈钢锅体与精度为0.5°C的10位AD采样测温NTC完美结合,辅以人工智能领域模糊控制“五段式加热法”控温曲线,实现了一条“煮”水位线煮三种熟度的蛋,同时配以三重安全防护,保证安全、品质。

67°C egg boiler is the first product in domestic market which treats eggs truly by boiling, and the 67°C is the most appropriate temperature for cooking spring-like egg based on our research. The human-machine interaction is so simple that you could easily cook four types of eggs by one touch, which is hard, soft, spring-like and steamed. Moreover, the sound and light reminders supply the user a good experience when it is cooking.

The product adopts bionics design, and the general shape is inspired by the image of cuddly chicken baby. Also, the anti-scald egg holder looks like a tree branch and bird nest, it can be easily brought out from the pot by one single hand, same usage of another multifunctional holder. Both the two holders are made by PP, a kind of food secured material that already passed the FDA certification. They are tasteless, non-toxic, and without deformation. In general, the body is in perfect harmony with accessories.

The pot is made by stainless steel 304, a kind of food secured metal. The pot also perfectly integrates NTC which can do 10-bit AD sampling in the accuracy of 0.5°C. Combined with “five-stage heating method” comes from AI fuzzy control field, the boiler can cook three different types of eggs with same water volume. Moreover, it provides triple protection to secure safety and quality.

设计灵感来源于“破晓黎明”，寓意“希望，获得新生”。水滴式弧度配合大面板半封闭式设计，在保证设计完整性的同时又易于清洁；大面板送风，让送风角度更广更舒适。

人体感应技术：让不同活动量的人都感觉舒适，从而缩短了达到人感所需温度的时间。光线感应技术，当检测室内光照减少时，空调自动判定为睡眠状态，智能调节风向和风量，避免冷/热风直吹人体，让舒适感受始终如一。Wi-Fi控制：机体智能WIFI可互联手机APP，实现用户远程操作。

智能自清洁：蒸发器自清洁技术，采用新一代宝石蓝超亲水抑菌涂层，可快速产生大量冷凝水，迅速瓦解、去除污垢，及时除尘抑制细菌滋生，抗菌率达到99.99% 超静音：自创15分贝静音技术，在提高风扇效率10%的同时，将噪音降到15分贝，全家静享美好舒适时光。

Inspiration comes from the 'dawn', meaning 'hope to get a new life'. A large panel of semi closed design, in order to ensure the complete design and easy to clean; large plate air supply, let air broader angle are more comfortable.

Eco-pilot sensors technology: so that people feel comfortable with different activities, thereby reducing the time required to reach the temperature of the person. Light sensing technology, when the detection of indoor lighting, air conditioning is automatically judged to sleep state, intelligent regulation of wind direction and wind, to avoid cold/hot air straight blowing the human body, so that the comfortable feeling of constant. Wi-Fi Controlling: The Haier AC can be connected to the smart WIFI mobile phone APP, remote operation of the user.

Intelligent self-cleaning: evaporator self-cleaning technology by a new generation of super hydrophilic sapphire blue antibacterial coating, to quickly generate a large amount of condensed water, rapid disintegration, remove dirt, timely and dust suppression bacterium, antibacterial rate reached 99.99%, effectively inhibit the bacteria on the surface of the evaporator. In the refrigeration, heating and standby for a variety of modes can achieve self-cleaning function and cleaning always, clean air for you. Super Quiet: Own 15 dB mute.

本产品特点:

JYZ-E21C 净瓷大口径卧式原汁机使用了 1200 度高温陶瓷螺杆作为核心榨汁部件,特点是高硬度、无磨损、不染色、好清洗,出汁率更高。顶端带有安全翻转盖结构的 71mm 大口径,可以实现水果免切割整颗挤压榨汁,使用十分方便安全。

九阳独创的高温烧制工艺的陶瓷螺杆是国内外第一个在原汁机产品中应用陶瓷材质的案例。陶瓷材质在耐高温性、硬度、耐磨性、抗腐蚀等方面具有优异的性能特点,7段黄金螺旋充分挤压果肉中的果汁,出汁率较传统榨汁机提升了55%,而陶瓷作为挤压螺杆的小家电产品应用标志着原汁机进入真正的健康原汁时代。

JYZ-21C针对用户体验进行了技术改进。独特的卧式出渣调节技术,实现了超高出汁率(可达92%)及果汁口感可调。榨汁过程中,用户可依个人喜好,只需轻轻拨动调节旋钮,便可在富含果肉纤维的果汁、清爽鲜纯的果汁或混合果汁间任意选择,体验更加完美。

The ceramic screw pole is made by 1200°C temperature as the core juicing components. The slow juicer JYZ-E21C with the big feeding tube is characterized by high hardness, wear resistant, not easy to be colored, easy cleaning and higher juice yield. On top there is 71mm big feeding tube with a safe cover structure, which enables to put a whole fruit without cutting into the tube for making juice and is very convenient and safe.

With ceramic screw pole which is calculated by high temperature, Joyoung is the first one in China to use ceramic material on slow juicer. The ceramic material has excellent performance in heat resistance, hardness, wear resistance, corrosion resistance and so on. The 7 section screw thread can fully squeeze the fruit juice so that the juice yield percentage can be increased by 55% compared with the traditional juicer. Using ceramic screw pole into small kitchen appliance means that the slow juicer enters an era of healthy juice.

For JYZ-21C, technological improvement was made based on user experience. A unique horizontal way of getting out the residue achieves a super high juice yield (up to 92%) and fruit juice taste can be adjustable. During the juicing process, the user can choose to have juice with rich pulp, fresh pure juice or mixed juice according to personal preference simply by turning the adjusting button, which makes a better user experience.

机器人收集数据后可实时在APP端生成地图, 用户可通过APP查看工作状态, 预约清扫、调节出水量。APP定期提醒用户清理尘盒、更换配件等提升了用户体验。

DEEBOT D33 is a semi-programmable floor cleaning robot equipped with an APP smart control and the Smart Move technology.

The robot comes with a brand new large-capacity electric-controlled water tank, and is designed based on the cleaning habit of Asian users against hard floors in order to meet the high efficiency and evenness wet mopping requirements. The robot offers an integrated sweep-and-mop cleaning mode via the front-end roller brush components.

After acquiring data, this robot can generate a map on the APP-end in real time. Users can check the operating conditions, reserve cleaning sessions, and adjust the water output levels using the APP. The APP can also improve user experience by periodically reminding the user to clean up the dust box and replace parts, etc.

专为儿童开发的学习灯，在设计上充分考虑了儿童的使用习惯和审美观，外形简洁，三个木棍组成的支架，具有长颈鹿的既视感，既有卡通效果，又有亲和力，充满童趣，既是儿童学习照明的灯具，又是一件玩具。

心灯由灯头和底座两部分组成，木棍底座加工过程中，很多工序需靠人工打磨，产品注入了木工师傅的手艺和心血，既有大工业制造的精密高效，又体现了传统手工的独特魅力。

可拆卸式结构，组装方便快捷，可极大的节省运输空间和成本，还能锻炼孩子的动手能力。

The product is designed for children for studying. The design gives full consideration to the children's habits and aesthetic concept. The design is a combination of simple appearance, consisting of three sticks a bracket, a giraffe visual sense, cartoon effect, and has the affinity, full of fun. It is not only children's lighting lamps, but also a toy.

Loving lamp consists of a lamp holder and the base is composed of two parts, the wooden base in the process, many processes required by manual polishing, the product into the master carpenter skills and efforts, both industrial manufacturing high precision, but also reflects the unique charm of the traditional manual.

The detachable structure, convenient assembly can greatly save not only transportation space and cost, but also the ability to exercise the child's hands.

**本产品特点:**

本产品是一款极具特色的户外野营产品—电神灭蚊灯,精巧时尚的造型吸引很多商家的目光,采用了大功率LED作为光源,兼顾紫外诱蚊及电网灭蚊于一体。电路采用防雷击技术,提高整机使用寿命,防雨等级:IPX6,是一款理想的环保经济节能的安全产品。

这款产品外形小巧,户外野营时可悬挂在帐篷内,不占空间,另外它采用标准Micro USB-5V可以对外充电,解决户外缺乏电源的问题,夜间灭蚊模式开启时,发出的紫外灯光能诱蚊,一旦蚊子靠近电网,灭蚊电网迅速地消灭蚊子,且不会发出响声,影响睡眠,这是本产品最大的亮点。

灯罩可以提供照明,有四个切换模式:低亮,中亮,高亮,灭,解决了户外夜间照明的问题。两个控制开关:一个按键控制灯开关循环工作,一键操作灭蚊功能。本产品独特的防水和防摔功能,可以用水清洁残留在电网中的蚊子尸体,做到产品干净整洁。独特的防摔功能,可一定程度的保护产品不会损坏。

This is an extremely unique outdoor camping product - Mosquito Killer Lantern. The compact and stylish appearance attracts attention of many businesses. The lamp adopts high-power LED as its light source, combines UV LED to attract mosquito with power grid. The Circuit uses anti-lightning technology to improve the life of the machine. The rain level is IPX6. It is an ideal and environmental product with energy efficiency.

This product is small, and can be suspended in the tent when outdoor campaigning, and the small shape does not occupy extra space. Besides, it uses the standard Micro USB-5V, which can be charged to solve the problem of lack of outdoor power. When anti-mosquito mode is turned on at night, the issue of UV light can attract Mosquitoes. Once mosquitoes fly close to the grid, the net can quickly electrocute mosquitoes without any noise, and does not affect our sleeping, which is the biggest highlight of this product.

The lower part of lamp can provide lighting, there are four switching modes: 20% Lighting, 50%Lighting, 100%Lighting off, which solve the problem of outdoor night lighting. There are two control switches: one button control light switch cycle work, another operate anti-mosquito function. This product has unique waterproof and anti-drop function which is the major feature and difference from other anti-mosquito product. We can use water to clean the remains of mosquitoes in the grid, so that the product can be clean and tidy. It is inevitable that the product will fell down or crack in the outdoors, but with the unique anti-drop function, the lamp will not be damaged easily in some degree.

雾化扇是将风扇与加湿功能结合的产品,不仅可以当普通风扇使用,还可联合加湿模块边吹风边加湿,是夏天使用的清凉神器,有雾化扇,用户家中就不用分别添置风扇和加湿器了,省钱省空间,一举两得。

边框与后壳一体出模,采用层次设计,从侧面看,机身更显纤薄明快,丰富的前后分色搭配彰显时尚与活力,前面板四周采用圆弧面过渡的造型设计,在自然光线下,产品显得圆润饱满,突显质感。

加湿水箱后置,机身重心稍稍后倾,利于平衡,无惧斜面放置操作,一键式开启水箱,方便拆卸清洗加水,水箱采用超大进水口设计,成人的手都可以轻而易举的伸进到水箱中,清洁无死角,进水口加大设计在加水时再也不用担心水外溅,轻松完成加水操作。

Atomization fan is the combination of fan and humidification function. It can be used not only as an ordinary fan, but the function of humidification, which in summer is the use of cool artifacts, fog fans. Users do not have to add fans at home and humidifier, and it can save money and space.

Border and the back shell model are made at once, and the use of level design, from the side, the fuselage is slimmer and brighter, rich before and after the separation with highlight the fashion and vitality, the front panel around the use of circular surface transition design. The product appears round and full, highlight the texture.

Humidified water tank rear, the body center of gravity slightly backward, conducive to balance, no fear of slope placed operation, one button to open the water tank to facilitate the demolition of cleaning water, water tank with large inlet design, adult hand can easily reach into the tank. It's clean with no dead ends, the entrance to increase the design in the water no longer have to worry about splashing, easy to complete the water operation.

创新的Sharkii鲨鱼手柄TM聚能熨烫头,内置储压式蒸汽装置,能够二次加热,保障强大蒸汽输出,不易滴水,实现高效熨烫。烫头上的九孔交叉蒸汽射流,有效去除异味和杀菌。

蒸汽增压是卓力的核心技术之一,这款挂烫机采用了卓力最新一代增压技术,达到5Bar压力,相当于家用轮胎两倍的压力瞬间释放,这样的增压蒸汽能够实现衣物的即熨即干。卓力精烫增压智能挂烫机的长效输出蒸汽量为80克/分钟,这是卓力经过研究论证后的黄金挂烫蒸汽量,能够层层深入织物纤维,快速熨平褶皱。

1.Turbo technology with 5 bars pressure. Tridimensional and powerful steam smoothes the wrinkles and remove odor quickly. 2.Sharkii handle for smart operation: A. one-handed operation; B. ergonomic design; C. second heating to avoid drip. 3.Five settings for different kinds of fabrics; ECO function. 4.Smart low water level warning. 5.Smart detection for water quality; two types self-cleaning with patent. 6.Foldable poles for easy storage. 7.The humanized details was designed for delicate lifestyle.

The innovative SharkiiTM Massing Energy handle was built in reservoir pressure steam setting which could reheat to make sure the powerful steam rate and avoid drip. The nine-vent design on handle generates crossed steam jet to help removing odor and sterilization effectively. This new design uses latest generation turbo technology which is one of Cuori's core technologies. The new turbo technology could generate 5 bars pressure which amounts to twice pressure release of home use tire instantly. This new technology could dry immediately by ironing. Under this new technology, the long-action steam rate is 80g/min which is gold steam rate by verification. It makes steam deep into fabric and removes wrinkles rapidly.

聚酯合金门窗异型材, 内部增强采用工程塑料PBT代替钢材, 通过一步法工艺技术实现“以塑代钢”, 国际首创, 使整窗K值降低 $0.2 \sim 0.25W/m^2K$, 赋予塑料门窗节能、环保和低碳的优越性能。

聚酯合金门窗异型材采用了世界上最先进的配方体系, 以钙/锌热稳定剂取代了铅盐, 有害重金属含量满足美国AAMA标准及欧洲ROHS限制指令。

聚酯合金门窗异型材产品特点: 超轻结构, 超高强度; 节能环保, 引领未来; 绿色健康; 超长寿命; 超便捷成窗制作。对建筑门窗行业具有节能减排的社会效益。另外, 产品的PBT材料由德国BASF公司提供, 并获准在包装上使用BASF的LOGO。

Polyester Alloy window and door profile is a creation in the world, replacing steel reinforcement with PBT, which is used as engineering plastic. PBT and PVC are co-extruded, decreasing K value by $0.2 \sim 0.25W/m^2K$. It is becoming a representative of plastic window and door system, renowned by its extraordinary energy conservation property, eco friendly nature and low carbon performance.

Polyester Alloy window and door profile adopts the most advanced formula, replacing traditional lead salt stabilizer with calcium and zinc. The percentage of hazardous metals qualifies US AAMA standards and European ROHS restrictions. Super light structure with super strong intensity; super energy conservation property with elongate lifespan; and simplified installation process, are all distinct features of Polyester Alloy window and door profile, helping set an influential example in window and door industry and bring us great social benefits. In addition, the product's PBT is provided by BASF, and is allowed to use the BASF LOGO on the product's packing.

两截拆卸式风管，方便收纳，可以缩小包装盒大小、提高装柜量。左右两侧以及底部均为风窗，可以缩短进风口到声道电机的距离。采用广口收缩的办法，在其他零件保持不变的情况下，风速风量明显强于同类产品。

手握区域，符合人机交互习惯。底座结实稳定，方便水平放置机器。

一款从中间进风尾部放置电池包的轴流吹风机。在同类产品中，这款机器体积小而且轻便，节省材料，降低了成本，而且很美观。

The 80V Axial Blower has two detachable blower tubes, which are easy for storage, reducing the size of the packaging box and improving the amount of loading. The left and right sides as well as the bottom are the air vent windows which shorten the distance from air intake to the motor. With the method of "mouth contraction", the wind speed and air volume are better than the normal products, in the situation of no changes on the whole structure.

Hand grip meets the habit for human using. The base is strong and stable, and can be placed horizontally.

Air vent positioned in the middle while battery port at the rear. In similar products, this machine is not only lighter in weight, easier for transporting and more beautiful in appearance, but also reduces material and cost.

本产品特点:

此款厨房龙头和包装都遵循国标和欧标, 这是一款吸引眼球的功能龙头设计, 带有磁吸技术的花洒头和可以随意摆动的软管, 使用方便, 这会给使用者很好的体验感。

- 龙头采用304不锈钢材质, 健康环保。
- 可切换花洒水和瀑布水两种出水方式。
- 采用磁吸技术, 易拿易放。
- 外观采用点线面元素设计, 线条简洁, 美观, 现代设计。
- 柔软随意变形的摇摆管可随意摆放, 清洗无死角。
- 硅胶管根据自己的喜爱、装修、潮流等选择合适的颜色, 我们有多种颜色可供用户选择。

Primy Kitchen Faucets follow the standard like GB, NE, WRAS, etc. This aesthetical design is very eye-catching and functional design. Due to the magnet fixing spray head and flexible rubber base, it makes it more user-friendly than existing faucets in the market.

- This faucet material is SS304 which contains no lead; it is healthy and user-friendly design.
- Dual with 2 functions of Shower Water and Flow Water spray head.
- Due to magnet technology on faucet, it is easy to take out and put down the spray head.
- This is aesthetic and trendy design, using the classic design elements.
- Pipe is soft and flexible and easy to clean.
- Faucet pipe has different colors; this faucet has many color choices to match with the home decoration style and the kitchen interior.

本产品特点：

卓越的节水功能，非凡的环保意识，出色的用水效益，可开关的网嘴。

通过出水口阀杆控制出水，开关控制在网嘴上，用于浴室冷热水龙头。当需要短暂停顿时，无需再次调温，可以减少水资源的浪费。

此款网嘴采用机械设计原理，达到感应水龙头的功效。无需另加感应器和电源，节省了安装网嘴体产生的额外成本，使水资源的利用率达到最高点。

Excellent water-saving effect, extraordinary eco-friendly awareness and outstanding water-using efficiency. The aerator can be controlled.

The water can be controlled by the tube in the outlet of aerator, which is used for the hot and cold taps in the bathroom. When a pause is required, there is no need to readjust the temperature, which can reduce the waste of water resource in the process.

The aerator adopts the Mechanical Design Theory, which has the effect of smart faucet. There is no need to install the sensor and the power, which ignores the additional costs of installing aerator's body, leading to a high water usage percentage.

双面短动程舌针多维编织和智能控制技术：实现了单台装备能生产所有纤维为原料的全成形系列服饰产品，所编织产品无任何拼接，一次成形。高机号（E28及以上）全成形编织技术：建立了全成形成圈动态仿真模拟，自主设计了全成形成圈机构，实现了细密全成形服饰产品的编织，织物密度达到20cpc。

高机号全成形贾卡技术：自主研制了高机号压电陶瓷贾卡针及控制其运动的软硬件系统，实现了全成形产品的成形、任意花型组合的提花。复合式组合连杆机构的多目标优化设计技术：自主设计了偏心连杆传动机构，通过优化设计，改善了机构的运动学与动力学特性，实现了短动程舌针的双面编织。

This fully-fashioned raschel machine uses intelligent 3D knitting technology; finish the whole look at a time. The machine is especially developed for producing clothes in special shape such as: fashionable dress, stockings and tights, gloves, scarf, sportswear, swimwear, medical bandage, 3D jacquard corsets, jacquard knitting tap and so on. This machine works with optimized crankshaft connecting rod system, EBC, jacquard device for pattern, multi-speed and elec-tronic fabric let-off and take-up controller to produce 3D fabrics.

Double-sided short-action tongue needle multi-dimensional weaving and intelligent control technology: to achieve a single equipment to produce all the fiber as raw materials, the whole series of apparel products, woven products without any stitching, a forming. High machine number (E28 and above) full forming weaving technology: the establishment of a fully formed into a circle dynamic simulation, independent design of the formation of the circle institutions, to achieve a fine all-shaped clothing products weaving, fabric density of 20cpc.

High machine-shaped all-shaped Jajia technology: independent developed a high number of piezoelectric ceramic Jia Jia needle and control the movement of the hardware and software systems, to achieve a full shape of the product shape, any combination of Jacquard flowers. Multi-objective optimization design technology of composite composite link mechanism: The eccentric rod drive mechanism is designed independently, and the kinematics and dynamics of the mechanism are improved by optimizing the design, and the double-sided weaving of the short-moving tongue is realized.

本产品特点：

此组浴室用品结合了人们对日常浴室整理的需求与美观，此款釉料又使得产品表面不易落下灰尘及沾上不易清洗液体，使得一间浴室显得整洁舒适，物品归类整齐，节约空间，特别讲究了浴室的美观。

软木的底部使得产品接触时不会发出太大声响，使至无声，更保证了物品的稳定性，位置固定。设计师特别考虑了人们的习惯与喜好设计了这样一个小细节。

此款可作为储物的好能手，在瓶中可以放棉签、棉花等洗浴用品，顶部严实的盖特别保证了瓶子物品的干燥、保质，可谓物小实用大。

This set of bathroom wares combine the daily needs of the bathroom with aesthetics. The glaze makes the product surface smooth and hard to be covered by dust or stained by unknwn liquid, making a bathroom neat and comfortable. The bottom of the cork enables the product to make less noise when it is used and it also ensures the stability of the goods. The designer took people's habits and preferences into consideration and made such a design.

This small pot can be used to store items, such as cotton swab, cotton and other toiletries. The cover can be closed tightly to ensure dryness and guarantee the quality.

本产品特点：

不锈钢可叠系列采用优质304，坚固耐用，质感卓越。此款设计改变传统汤锅盖，盖头，手柄和锅身的关系，创新性的设计了一种全新的连接结构，提供了一种新颖的滤水方式和炊具使用体验。

独特的盖子，手柄，锅身的设计方式，能使此套产品方便的叠加起来，极大的节约了消费者的厨房使用空间，也极大的缩小了产品的包装空间，节约了产品运输成本。

独特的盖子，手柄与锅身的连接方式，使此产品具有滤水功能，能让消费者方便将汤汁或者水与食材进行分离。也通过盖子和手柄的巧妙设计，能让盖子以不同的角度立在副柄上，也避免了盖子与灶台接触，干净卫生。

SS Stackable Set uses Stainless steel 304 for durability and excellent texture. This design re-establishes the relationship among the pot lid, knob, handle and the pot body and makes innovation on the connection structure of the whole set of products and provides a new cooking experience and a new way of filtering water.

The unique design of the handle, lid and pot body stacks up the product easily and saves consumers kitchen space greatly; meanwhile, it reduces the packaging space and saves product transportation cost.

The unique connection way between the handle and the pot body gives the function of filtering water, which makes it so convenient to separate the soup /water and the ingredients. Through the ingenious design of the cover and the handle, the cover can be arranged on the auxiliary handle at different angles. Without touching the top of your kitchen, leaves your kitchen clean and tidy.

**本产品特点:**

阿尔卑斯山脉是欧洲最大的山脉, 总体呈弧形, 山脉在阳光的照耀下仿佛被切割的钻石一样熠熠生辉, 此款产品的设计灵感正是来源于此。

舒适的坐感是我司一直以来对任何一款椅子的基本追求, 除了选用PP材质外, 此款产品在椅子的设计上也是将人体工程学进行到底, 椅面运用人体工程学中臀部曲线设计, 有效释放上身对臀部、腿部压力, 保持人体血液顺畅循环, 从而让客户体验到舒适安全的坐感。

此款产品线采用的是流畅明朗的设计, 旨在于渲染北欧式风格。椅面的整体造型则是仿造钻石的切割工艺, 给人以视觉上的美好享受。

Alps is the highest mountain in Europe and its shape is arc. The snow mountain sparkles under the sunshine as if a diamond being cut and this is where the design inspiration of this product comes from.

Comfortable seating feeling is the basic pursuit of our company. In addition to the use of PP material, the design of the chair conforms to the human body engineering-the surface was designed according to hip curve of human body, effectively releasing the pressure of the hips and legs, which can keep up the circulation of the blood flow.

This product line is fluent and clear, aiming at creating a north European style. The overall modelling of the chair is an imitation of the diamond cutting process, giving the enjoyment with the beauty on the vision.

**本产品特点:**

美国进口BOA系带系统, 采用军用级别高强度凯夫拉材料, 有效保护内外侧面, 鞋面头层牛巴戈曲折性、耐磨性更佳; 橡胶鞋头为脚趾提供保护性; 后跟TPU增加稳定性。

美国进口BOA系带系统, 鞋带内由49股航空级别不锈钢丝组成, 一按一扭2秒系带, 打破传统鞋带系带模式, 让行走更简便。军用级别高强度凯夫拉材料与头层牛巴戈完美组合, 提升耐曲折性、保护性。

BOA lacing system, imported from USA, adopted military-level high strength Kevlar material, effectively protecting the internal and external side of the vamp. The vamp is made of nubuck which makes the top layer leather better flexible and resistant, and rubber toe cap can protect the toes, while TPU under-sole for better stability.

BOA lacing system, imported from USA, has stainless steel wires made of 49 stranded aviation material shoe lace, easy lacing against tradition via one press and one twist done in 2 seconds, facilitating walking with easy putting on and taking off shoes, and walking.

The perfect match of military level high strength Kevlar material and Nubuck material enhanced the flexibility and protectiveness of the shoes.

评委评价 Comments of Jury**郑慧筠 Vivian Cheng:**

裁剪得当, 做工精细, 搭配快速绑带的专利结构, 可以说具备了一双好鞋子必要的元素。

Tailoring, fine workmanship, with the BOA patent system for fast bandage. The product has the necessary elements of being a pair of good shoes.

本产品特点:

采用3D立体裁剪结合领先的新型无缝贴合技术,采用不规则的胶条贴合代替传统的缝线将羽绒区分开,有效减少布面针孔,从而减少绒根溢出,增强防风泼水性能。

内里采用GEO-Omni技术,该技术通过反射性材料快干,透气底布之点阵式应用,从而获得极好的保暖效果,通过物理折射原理,将身体的热量完美保存,还能通过面料(银色区域)反射到人体,相当于自发热的强大功能。

填充物采用新型的科技速干羽绒,在800秒内迅速挥发绒内湿气,解决了传统羽绒易湿易潮的缺点,让人体保持干爽,哪怕在即寒湿的地区也能快速干燥;拥有双重穿着形式,正反两面穿着,这样设计的优点在于当你在极寒或者是高山区,当温度高或低的时候,可以自由转换热度,随心所欲,让身体永远保持舒适的体温。

This design uses 3D cutting technology combined with the leading seamless skill. It uses irregular seam tape instead of the traditional stitching to fix the down, effectively reducing pinholes and down leaking, while enhancing the performance of windproof and water repellent.

Lining uses GEO-Omni technology, the dot matrix application on the moisture-wicking, air-permeable backing of the reflective material to obtain excellent warmth effect. Through physical refraction principle, the body will not only keep itself heat, but also reflect heat to the body through silver area fabric, which equals to a strong self-heating function.

Filled with the new type of quick dry down feathers, the jacket quickly evaporates moisture inside down within 800 seconds. It solves the shortcomings of traditional feathers which is easy to be wet and moist, so that the body can quickly get dry, even in the cold or wet areas; double sides wearing. The advantage of this design is that when you are in the arctic or high mountain area, when the temperature is high or low, you can control the heat to keep a comfortable body temperature.

评委评价 Comments of Jury

孟恩周 Enjoo Maing:

缝线紧密有序,做工很好,在维度高的地区市场定会十分受欢迎。

本产品特点：

此件夹克的重大特点是使用了目前大胆的创新做法，水溶电解质面料进行织造，让面料拥有高透气，高防水的神奇功能，合理的设计结合立体3D裁剪让衣服更加的实用，有功能。

在面料织造中植入人造棉纱，在特殊的染料时把这条人造纤维给溶解，面料上产生了N多个笔芯大的洞洞，保证在运动时100%的透气功能；此面料用了目前最新的NANOTEX无氟防水助剂，能有效将水珠凝结成水滴，快速滑落，保证水上运动轻松愉悦。

此件衣服的结构十分合理，侧拼片采用高弹力面料，贴心的考虑到运动所需要的伸展性；各种绳扣的小细节让整件衣服更加亮眼，同时还具有防蚊除臭功能。

The most important feature of this product is the special Water soluble electrolytic fabric, which has high permeability and high waterproof function.

In weaving process, many artificial cotton yarn is implanted on the fabric, the man-made fiber is to be dissolved by special dyes, so the fabric has a plurality of Nib size holes, which ensures 100% ventilation function even during sustained motion. And the fabric is made of the latest NANOTEX fluorine free water additives, which can effectively condense steam into water droplets, drops rapidly. Finally the wearer is more easy and enjoyable during the water sport. The other features include: reasonable design combined with 3D cutting; well-fitting structure; the high stretched fabric in the side panels give more extensibility during the sport; the details such as stopper/zip puller etc. make the jacket more dazzling and the fabric has anti-mosquito and deodorizing function.

TPU可拆卸调节式扣带, 中心置入升级版GPS+定位系统, 打造个性化贴合感的同时综合了精准定位, 安全围栏, 安全聆听, 轨迹回放, 一键呼叫, 多人协作等强大功能。

灵感源于对自然的转换, 渐变元素来源于风吹过岩石留下的痕迹, 代表自然的雕刻能力。鞋子重量进一步减轻, 同时运用贾卡材质, 通过脚部工程学织出不同大小的透气网眼, 提升关键部位透气性。中心置入升级版GPS+定位系统, 安全可靠。

1. 弯曲凹槽设计易弯折, 后跟线条动力引导驱动。 2. 轻盈中底/外底, 打造出出色缓震性能, 以透明气垫的方式出现在鞋跟部位, 增加缓震回弹效果。 3. 华夫格外底结合橡胶设计, 外底则融入分区橡胶设计, 提升关键区域的耐磨性。

The vamp is equipped with detachable and adjustable TPU strap and a upgraded version of GPS with positioning system embedded in the middle to create a personalized feel. The GPS collection of precision positioning, electronic fence crossing reminder, security listening, real-time position tracking record, call in one touch in emergency case, mutual assistance and other powerful functions.

Inspired by the nature and gradual element comes from the traces of the wind blew over the rock, it represents the natural engraving ability. The weight of the shoes has been further reduced, and the vamp used Jacquard material. Through foot engineering, we weave meshes in different sizes to enhance the key parts of the permeability. A upgraded version GPS with positioning system embedded in the center makes it more safe and reliable.

1. Bend groove design is easy to bend, followed by line power to drive. 2. Light in the midsole and outsole, it creates excellent cushioning performance, a transparent air cushion in the heel parts, increases the cushioning effect. 3. Waffle special combination of rubber design, the outsole is integrated into the partition rubber design, to enhance the wear and tear of the key areas.

**本产品特点:**

一种新型的可折叠塑料收纳桶。造型美观, 现代, 功能实用强大。材料、工艺、包装的设计都体现环保诉求。

用作浴室的脏衣收纳或客厅的玩具或杂物收纳, 产品开口处翻折后可形成带孔的盖子, 防尘、遮丑又不妨碍放入物品, 两种开口状态, 适合不同喜好。同时产品可折叠成平板状, 方便收纳和运输。

1, 使用塑料PP片材, 采用超声波烫合工艺, 无胶水, 材料环保、价格便宜, 防水且方便清洁。2, 产品口边翻折设计, 大开口与带小开口的盖子两种状态。3, 可折叠成平板状, 不使用的时候可放置在缝隙中。4, 平板包装, 节约运输成本。

This is a new mode of collapsible plastic storage basket, which has not only modern, artistic and attractive appearance, but also practical and powerful functions. The design of this product has fulfilled the eco-friendly demands as well.

This storage basket can be used in the bathroom for gathering the laundry, or in the living room for toys and other sundries. The design of the round shape handles guarantee that, when the area of the handles are folded, a lid with round opening will be established. The laundry and other objects can be put into the basket through that opening. Also, this lid can keep the inside objects away from dust. Meanwhile, the basket can be folded flat to make the storage and transportation conveniently.

1.Using the eco-friendly PP plastic as the material, produced by applying the ultrasonic welding procedure without glue, the product is water proof and easy to clean. 2.With the design of the round shape handle area, the basket has two states of application, wide opening and round opening after folded the handle area. 3.Folded flat, can be put into small gap when not in use. 4.Flat packed, save the freight cost.
